Professional Profile

Senior developer with software development experience **since 2010**, focused on **Mobile, Web Full Stack, and AI Engineer** roles. I bring experience across mobile development with **Android** and **iOS**, **Web** development, **Java and Python** backends for a range of projects, and integration of AI-based solutions.

I adopted AI coding assistants early for development and automation, progressing into **AI Engineering** with prototypes, agents, and LLM integrations.

AI Engineering, Mobile, and Web Full Stack Specialization

- Software development since 2010 for corporate and product environments.
- Native Android development with Kotlin, Java, Jetpack, Compose, maintainable architecture, local persistence, networking, and API integration.
- iOS development with Swift, Objective-C, UIKit, SwiftUI, and Apple ecosystem tools.
- Web development with React, Next.js, TypeScript, and JavaScript for products, portals, internal tools, and supporting frontends.
- **Java** backend development across enterprise projects, building services and integrating them with mobile and web applications.
- **Python** backend development for APIs, tooling, automation, prototypes, and service integration.
- Applied work as an **AI Engineer** with LLMs, agents, tool calling, skills, MCP, prompting, and tool orchestration.

Tool Stack

AI: `LLMs` · `Agents` · `Agent Skills` · `Tool Calling` · `Prompt Engineering` · `Context Engineering` · `LangChain` · `Langflow` · `n8n` · `Langfuse` · `Vertex AI` · `Hugging Face` · `Fine Tuning` · `LoRA` · `MCP Servers` · `Codex` · `Claude Code` · `OpenCode` · `Jev` · `Laya` · `Non-autoregressive decision models` · `Ollama` · `LM Studio` · `PyTorch`

FrontEnd - Android: `Android` · `Kotlin` · `Java` · `Jetpack Compose` · `Android Jetpack` · `MVVM` · `Clean Architecture` · `Room` · `Hilt` · `Dagger` · `Retrofit` · `Coroutines` · `Flow` · `SQLite` · `Gradle` · `Firebase` · `REST APIs` · `CI/CD`

FrontEnd - iOS: `iOS` · `Swift` · `Objective-C` · `SwiftUI` · `UIKit` · `Xcode` · `Cocoa Touch` · `Core Data` · `URLSession`

FrontEnd - Web: `React` · `Next.js` · `TypeScript` · `JavaScript` · `Tailwind CSS` · `HTML` · `CSS`

BackEnd - Java / Python: `Java` · `Python` · `FastAPI` · `REST APIs` · `Automation` · `Scripting` · `SQLite` · `Docker` · `CI/CD`

Cloud: `GCP` · `Azure`

Professional Experience

Grid Dynamics / Mobile Computing S.A.

Full Stack Developer (T3) / AI Engineer — Grid Dynamics
Mar 2025 - Mar 2026
Senior Full Stack Developer — Mobile Computing S.A.
Jun 2013 - Mar 2025

Grid Dynamics acquired Mobile Computing in March 2025, continuing the professional relationship under the Grid Dynamics organization.

My work at Mobile Computing evolved from mobile and full stack development toward applied research and AI Engineering in the later part of my tenure.

- Contributed to the design and development of a business-oriented web application, from functional definition through delivery.
- Established Mobile Computing's Research and Development area and led it for four years, focusing on AI applied to software engineering, technical direction, and adoption of new tools.
- Worked as an AI Engineer, AI Researcher, and Senior Software Engineer in applied research involving LLMs, agents, and AI tools for productivity and automation.
- Designed AI-assisted workflows and prototypes focused on model integration, orchestration, and deterministic behavior.
- Implemented automation, internal tools, and engineering practices to strengthen development and operations cycles.
- Extensive mobile development experience across Android, iOS, and cross-platform technologies.
- Designed and built mobile and web applications for corporate and research environments.
- Developed Java backends across projects including AB InBev and Sociedad Rural Argentina, integrating services, APIs, mobile apps, and web frontends.
- Built scalable, maintainable solutions oriented toward real product operation.

Projects: Walmart (Android) · Bagó (Android/iOS) · AB InBev (Android/Java backend) · Sociedad Rural Argentina (React/Java backend) · Banelco/Prisma (Android/iOS) · HSBC (Android) · Samsung (Android)

@rtech S.R.L.

Senior Developer
May 2010 - Jun 2013

- Developed enterprise and mobile applications in C#, VB.NET, ASP.NET, Objective-C, Java, and JavaScript.
- Worked on mobile games and apps such as *Rescue me from Asylum*, *AfterLife Samurai*, and *DimBot Unit 12*.
- Used Xcode, Eclipse, Blender, Gimp, Unity Engine, and Zebra scripting.

Projects: Gestión Compartida · Procter & Gamble

Bosch Argentina Industrial

Senior Auditor
Jun 2001 - Dec 2009

- Internal auditor and senior quality control specialist.
- Led a team of junior auditors.
- Implemented and monitored ISO standards in production processes.

Highlighted Projects

AIDZero

Personal Project
Repository: https://github.com/guillermojmontenegro-hub/AIDZero

- Modular runtime for LLM agents built in Python.
- Integration of local tools, model adapters, and MCP gateway.
- Agent profiles to configure runtime behavior, defaults, and capabilities.
- Experimentation base for assisted workflows, automation, and tool orchestration.

Personal CV Website and Technical Library

Personal Project
Website: https://guillermojmontenegro.dev/

- Built with `Next.js`, `React`, `TypeScript`, and local JSON/Markdown content.
- Organizes professional profiles, technical documentation, and a learning library.
- Used as a technical communication platform and support surface for multiple CV variants.

Education

- **Electrical Technician with Industrial Electronics orientation**
  E.E.T. No. 4 Ing. Emilio Mitre, 1993 - 1999
- **Systems Engineering (incomplete)**
  National Technological University, 1999 - 2002
